ABOUT ME

Second-year B.Tech Computer Science student at Indian Institute of Information Technology Kottayam with a strong interest in software development, problem solving, and building scalable web applications. Skilled in full stack web development and Data Structures & Algorithms, with hands-on experience in developing responsive and user-friendly applications.

Proficient in technologies such as HTML, CSS, JavaScript, React.js, Node.js, Express.js, and MySQL/MongoDB, along with Git and GitHub for version control. Comfortable working with REST APIs, frontend-backend integration, and database management. Strong understanding of DSA concepts including arrays, linked lists, trees, graphs, sorting, searching, and dynamic programming.

Passionate about learning new technologies, improving coding skills, and gaining practical industry experience through projects and internships.

EDUCATION

INDIAN INSTITUTE OF INFORMATION TECHNOLOGY KOTTAYAM

B.Tech in Computer Science and Engineering

2024 – Present

CGPA: 8.23

CMR HIGHER SECONDARY SCHOOL

Class XII –Kerala Board

2024

Percentage: 98.2%

SKILL

- Problem Solving
- Team Collaboration
- Adaptability
- Analytical Thinking
- Communication
- Development skills

PROJECTS

Primate

Developed a full-stack web application that analyzes and compares product prices across multiple e-commerce platforms such as Amazon and Flipkart to help users find the best available deals. Implemented product search, price comparison, and smart recommendation features with a user-friendly responsive interface. Integrated APIs/web scraping techniques for fetching product details and pricing data, along with filtering and sorting functionalities for enhanced user experience. Built using technologies such as React.js, Node.js, Express.js, and MongoDB/MySQL.

Image Detector – AI-Based Object Detection System

Developed an AI-powered image detection application capable of identifying and classifying objects present in uploaded images using computer vision and deep learning techniques. Implemented image processing and object recognition functionalities to analyze images and display detected objects with high accuracy. Designed an interactive and user-friendly interface for image upload and result visualization. Utilized technologies such as Python, TensorFlow/OpenCV, and modern web technologies for seamless integration and performance.

AI chatbot

Developed an AI-powered chatbot capable of generating intelligent and context-aware responses to user queries using Natural Language Processing (NLP) techniques and AI APIs/models. Designed a responsive and interactive chat interface that enables real-time communication and seamless user experience. Implemented features such as message handling, conversation flow management, and dynamic response generation. Built using technologies such as React.js, Node.js, and AI/NLP integration tools.

Objectives

- Understand **emerging trends in management**
- Role of **creativity and innovation**
- **Creative process** in organizations
- Managing **e-business**
- Challenges in **globalized management**

Introduction

- **Business environment is dynamic**
- **Technology and globalization influence management**
- **Innovation and knowledge management are essential**

Meaning of Emerging Trends

- New **managerial ideas and practices**
- Driven by **technology and globalization**
- Helps **organizations remain competitive**

Major Emerging Trends

- **Digital transformation**
- **Knowledge management**
- **Sustainability and CSR**
- **Agile management**
- **Data-driven decision making**

Technology & Digital Transformation

- **AI and automation**
- **Big data analytics**
- **Internet of Things**
- **Robotics and smart systems**

Knowledge Economy

- Knowledge as **strategic resource**
- Importance of **skilled workforce**
- **Continuous learning culture**

Workforce Diversity

- Multiple cultures
- Generational diversity
- Gender inclusion
- Global workforce collaboration

Case Study: Google

- **20% innovation time**
- **Open culture**
- **Flat organizational structure**
- **Products like Gmail emerged**

Creativity vs Innovation

- **Creativity**: generation of new ideas
- **Innovation**: implementation of ideas
- Both essential for growth

Importance of Creativity

- **Competitive** advantage
- **Product** development
- **Process** improvement
- **Organizational** growth

Factors Promoting Creativity

- **Supportive leadership**
- **Freedom to experiment**
- **Open communication**
- **Team collaboration**

Intrapreneurship

- Employees behave like **entrepreneurs**
- Encourages **innovation**
- Drives **business growth**

Case Study: 3M (American Multinational Corpn)

- **15% innovation time**
- **Cross-department collaboration**
- **Innovation: Post-it Notes**

Creative Process Meaning

- **Systematic steps to generate innovative ideas**

Stages of Creative Process

- Problem identification
- Preparation
- Incubation
- Illumination
- Verification

Problem Identification

- Recognizing **opportunities**
- **Defining** problems clearly

Preparation Stage

- Research and information gathering
- Brainstorming ideas

Incubation Stage

- Subconscious **idea development**
- **Reflection and experimentation**

Illumination & Verification

- Eureka moment
- Testing and **implementing** ideas

Case Study: Apple

- Customer research
- Design thinking
- Prototype testing
- iPhone innovation

Meaning of E-Business

- Conducting **business via internet technologies**

Components of E-Business

- E-commerce
- Digital marketing
- Online customer service
- Supply chain integration

Benefits of E-Business

- Global reach
- Lower costs
- Faster communication
- Better customer engagement

Virtual Teams

- **Remote work** across countries
- **Technology-enabled collaboration**

Case Study: Amazon

- **AI** recommendations
- Efficient **logistics**
- **Customer-centric** strategy

E-Business Challenges

- Cyber security risks
- Data privacy issues
- Rapid technological change

Technological Challenges

- **Continuous updates**
- **Need for skilled digital workforce**

Ethical Challenges

- Data misuse risks
- Consumer privacy
- Ethical AI

Meaning of Globalization

- Integration of global markets and economies

Features of Globalized Management

- International trade
- Global supply chains
- Multinational corporations

Benefits of Globalization

- **Access to larger markets**
- **Innovation and knowledge sharing**

Challenges of Globalization

- **Cultural differences**
- **Legal variations**
- **Global competition**

Case Study: Toyota

- Global production
- Lean management
- Efficient supply chains

Conclusion

- Management evolving rapidly
- Innovation and creativity essential
- E-business and globalization shape future

THANK YOU

**Discipline is choosing between what you want now and
what you want most.”**

— Abraham Lincoln
